PROJECTS

CooksBook Web App (Rails, Backbone)   **Live** | **GitHub**

A recipe sharing website in the vein of Yummly.
- ❖ Single-page Backbone app consuming RESTful JSON Rails API.
- ❖ Overrides parse and toJson methods to deal with nested collections and models.
- ❖ Index page uses custom SQL query to return top tags and their associated recipes.
- ❖ Wolfram Alpha API integration produces nutrition label based on user-entered ingredients. Facebook Authentication included.

Snake (Javascript)   **Live** | **GitHub**

Browser version of the arcade favorite. Uses custom JQuery to render snake and apples.

Chess (Ruby)   **GitHub**

Chess game written in Ruby for the Terminal. Implements inheritance from chess-piece superclasses to DRY up code.

SKILLS

Ruby, Rails, Javascript, jQuery, Backbone.js, Git, mySQL, postgreSQL, HTML5, CSS, Angular(learning)

WORK HISTORY

Database Administrator, New York City Bar Justice Center
New York, NY — 2014
- ❖ Managed project to implement new cloud-based database to improve data collection for grants and brochures which increased funding.
- ❖ Gathered requirements to fully customize database to needs of organization. Gained expertise in the Legal Server database system to accomplish this.
- ❖ Initiated several data-related side projects including using Google Analytics to drive traffic to website and HTML work to touch up front end of database.

Associate Business Analyst, AIG
New York, NY — 2009-2013
- ❖ Quality testing and system implementation of outsourced projects – ensured databases and websites ran according to business requirement standards and interacted with Microsoft Office to create reports for upper management.
- ❖ Customer service/tech support for internal users of intranet databases/websites
- ❖ Collaborated on project management team for IT projects. Worked on business requirement documentation for projects - databases and intranet websites.
