PROJECTS

CooksBook Web App (Rails, Backbone)   Live | GitHub

A recipe sharing website in the vein of Yummly.

- ❖ Single-page Backbone app consuming RESTful JSON Rails API.
- ❖ Overrides 'parse' and 'toJSON' methods to recreate Rails-like associations on the front end.
- ❖ Index page uses custom SQL query to return top tags and their associated recipes in a single transaction.
- ❖ Wolfram Alpha API integration produces nutrition label based on user-entered ingredients.
- ❖ Implements facebook Authentication using OmniAuth.

Snake (Javascript)   Live | GitHub

Browser version of the arcade favorite.
Uses custom JQuery to render snake and apples.

Chess (Ruby)   GitHub

Chess game written in Ruby for the Terminal.
Implements inheritance from chess-piece superclasses such as sliding pieces and diagonal-movers to DRY up code.

SKILLS

Ruby, Rails, Javascript, jQuery, Backbone.js, Git, mySQL, postgreSQL, HTML5, CSS, Angular (learning)

WORK HISTORY

Database Administrator, New York City Bar Justice Center
New York, NY — 2014

- ❖ Implemented new database to improve project data for brochures and grants, which in turn increased funding.
- ❖ Gathered requirements to fully customize database to needs of organization. Learned Legal Server database system on job to accomplish this.
- ❖ Headed project using Google Analytics to target which blog posts drove the most traffic to the website which directed writing topics

Associate Business Analyst, AIG
New York, NY — 2009-2013

- ❖ Ensured databases and websites ran according to business requirement standards
- ❖ Created reports for upper management using IT projects I helped manage.
- ❖ Customer service/tech support for internal users of intranet databases/websites
- ❖ Wrote business requirement documentation for IT projects.
